

## Product Data Sheet

### Product: AK Zorbit

Made of 100% recycled, organic, cellulose fibers. Clean, recycled cardboard and newsprint is collected from local sources. It is then milled and processed to achieve absorption seven times its weight. AK Zorbit is a loose absorbent material packaged in 25 lb recyclable bags.

### Use:

AK Zorbit can be used to absorb oils, coolants, solvents, water, fuels, and antifreeze. Works in all temperatures. No silica dust. Can be used in an incinerator.

### Product Details:

Dimensions: 28 in x 12 in x 17 in

Weight: 25 lbs

### Precautions:

Material is organic, therefore combustible. Avoid extreme heat and open flame. Thermal decomposition may produce carbon monoxide and carbon dioxide. No known health hazards exist. Cellulose is not listed as a potential carcinogen.

Dispose in accordance with all applicable federal, state and local environmental regulations. Dispose as non-hazardous waste. Not considered hazardous per Resource Conservation and Recovery Act (RCRA) regulations (40 CFR 261). See safety data sheet for more information.

Manufactured by Thermo-Kool of Alaska at 4191 E. Dimond Way, Wasilla, AK 99645
